PROFILE

With over 2 years of experience in backend development, I have honed my skills in PHP, MySQL, and Laravel, delivering robust solutions for various projects.

I am eager to deepen my knowledge and tackle more complex challenges as I work towards becoming a senior backend engineer. I thrive in collaborative environments where I can share insights and learn from others, continually pushing the boundaries of my skill set.

PROFESSIONAL EXPERIENCE

06/2025 – Present
Alexandria

Devops Intern

DEPI 

DevOps intern with hands-on experience in CI/CD, cloud automation, and scripting, eager to optimize infrastructure and deployments.

12/2024 – 06/2025

Career Break

Health & Professional Development Took a planned break to focus on my health, followed by dedicated time to deepen my technical expertise and explore new opportunities

02/2023 – 12/2024
Alexandria, Egypt

Software Engineer

nWeave 

As a Software Engineer (**Backend - Laravel**), I was primarily responsible for designing, developing, and maintaining the backend architecture of a multi-tenant healthcare web application, my role involved building scalable APIs, optimizing database structures, implementing authentication and authorization systems, and ensuring seamless communication between the central system and tenant databases.

02/2024 – 08/2024
Cairo, Egypt

Laravel developer

Logic 

Freelance Laravel Developer | Built custom systems with Laravel + Livewire, from DB design to frontend support.

EDUCATION

09/2013 – 01/2019
Assiut, Egypt

Bachelor of Computers and Information Technology
Assiut University (AUN) [↗](#)
Computer Science Department

INTERNSHIPS

08/2022 – 11/2022
Alexandria, Egypt

FULL STACK PHP DEVELOPER [↗](#)
ITI-MCIT

06/2022 – 07/2022
Remote,
Smart Village, Egypt

BACK END LARAVEL DEVELOPER [↗](#)
NTI - MCIT

08/2020 – 11/2020
Remote, Egypt

FULL STACK PHP
YAT ACADEMY - MCIT

PROJECTS

02/2023 – 02/2024

Multi-Tenants Project [↗](#)
Laravel APIs

Developed and maintained a large-scale, multi-tenant healthcare SaaS platform for AHS-nWeave, designed to serve multiple independent healthcare providers (tenants) under a single unified system. The platform ensured data isolation, secure role-based access, and centralized management while allowing customization per tenant's workflow.

02/2024 – 08/2024

HR Management System-freelancing
Laravel , Livewire

Developed a modular HR assessment system designed to streamline the hiring process by automating candidate evaluations, interview scheduling, and data management. The system supports multi-stage assessments, bulk Excel imports/exports, and a dynamic scheduling matrix to determine optimal interview times for candidates and interviewers.

09/2022 – 11/2022

E-commerce Jumia Clone project [↗](#)
Laravel , Angular

- Developed a feature-rich Jumia clone (e-commerce website) as part of a collaborative team effort during ITI training.
- Key features: User authentication, product search/filtering, cart/checkout system, admin dashboard, and responsive UI.
- Delivered a fully functional demo ([YouTube Demo Link](#) [↗](#)) and documented the project in the GitHub Repo README.

06/2022 – 06/2022

Inventory managemnt system [↗](#)
bootstrap and native php

Developed a web-based Inventory Management System (IMS) as part of the NTI (National Telecommunication Institute) final project, featuring an admin dashboard, user authentication, and CRUD operations for inventory tracking. Built using native PHP (procedural/OOP) and Bootstrap for responsive frontend design, the system allows businesses to manage stock levels, suppliers, orders, and sales efficiently.
